Rutgers University Press. Paperback. Book Condition: new. BRAND NEW, In Search of Swampland: A Wetland Sourcebook and Field Guide (2nd Revised edition), Ralph W. Tiner, Traditionally, most Americans have viewed natural wetlands as wastelands, places to be drained and converted for farming or filled for housing and industrial development. To date, over half of the country's wetlands that existed when the Pilgrims first landed in America have been destroyed. Today these "wastelands" are beginning to be recognized as one of the world's most valuable natural resources. They are the temperate zone equivalent of rain forests, serving vital life-sustaining functions in water-quality renovation, aquatic ecosystem productivity, and biodiversity, as well as providing benefits such as flood-damage protection and shoreline stabilization. In the revised and expanded edition of this classic guide, Ralph W. Tiner introduces readers to the ecology and beauty of these valuable natural resources. Topics include the formation and functions of wetlands, wetland types, causes of loss and degradation, and recent efforts to protect them. The discussion now includes many examples from the Great Lakes region and information on best management practices for working in and around wetlands including vernal pools. A new chapter on classification and assessment further clarifies how the unique characteristics of wetlands serve specific functions. "In Search of Swampland" also provides a field guide to wetland plants, soils, and animals. It includes detailed descriptions and illustrations - many of which are new to this edition - of more than 300 plants and 200 animals. Clear identification keys, information on how to distinguish typical hydric or "wet" soils from dryland soils, and general procedures for identifying wetlands in the field make this book an indispensable resource for readers with little or no training in wetland science, as well as for the scientist or amateur naturalist. While the...
