Not illustrated. 1921 edition. Excerpt: a water plant is relatively very small; and we should notice that it is in connection with operation that municipal ownership has been most defective. On the other hand, the initial cost of a water system is usually quite high.1 The real reason for municipal ownership of municipal water supply is not economic but social. Water is far more a public necessity than even light, transportation, or telephone service. The ordinary water supply is used for drinking by a very large percentage of the city dwellers. Every household needs an additional supply and every house with grounds uses a large amount. It is, therefore, necessary and desirable that the water should be not only pure, cheap, and abundant, but that it should be carried to all households within the city limits. Since epidemics of typhoid and some other diseases have been traceable to impure...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
