Grin Verlag Okt 2009, 2009. Taschenbuch. Book Condition: Neu. 212x147x18 mm. This item is printed on demand - Print on Demand Titel. - Water is the base of all human existence. First of all for drinking, food production and hygiene, but also for all other developments of contemporaries human society. The United Nations has estimated world population would grow from 6 to 9,3 billion between 50 years and beside this people are getting wealthier . Thus can be no doubt of a rising global demand for freshwater, but climate change and other environmental factors will lead to short run of water in certain regions. In consequence water can be predicted to become a security issue and a reason for conflict, as it even may be today in some regions. Only 2,5% of all water on the earth is freshwater. 70% of this freshwater is frozen at North and South Pole, 29% are bonded not accessible for mankind as soil moisture and in underground aquifers . About 1% (0,007% of all water) is useable for mankind, but water is renewable resource . This numbers underline the importance of the question, if it is possible supplying all humans with enough water or if water may lead to conflict. Chapter 2 will discuss the questions of waters potential as a reason for dispute, conflict or peaceful development. Dispute is to understand as a political issue while conflict could further mean use of other elements than political including force. Connected to this Chapter 3 will analyse how water disputes and fertility, mortality and migration relate to each other. This is important because developments of the last three factors are highly dependent on fresh water accessibility. As examples for today s water disputes two case studies on Israel/Jordan/Syria/Lebanon and Turkey/Syria/Iraq will be made. Even if...
